DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities a grammatical error. In paragraph [0010] on line 7 the applicant recites "fixedly", which is not a word. The examiner would like to suggest that the applicant reword the sentence to read that the rigid inner member is fixed or say something of that sort.

The disclosure is further objected to because of the following informalities: incorrect heading. The applicant has a section of the discloser titled "Summary of Disclosure." Applicant is advised to change the title to read Summary of the Invention.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 5-9 recite the limitation "the sheath" in line 1 of claim 5 and in line 2 of claim 7. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-20 rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent 5,634,928 Fischell et al.

In regards to claims 1-19 Fischell discloses the same invention being a catheter (10), a handle comprising an inner tube (13), and outer tube (24), and a rigid member (11) which protrudes beyond the distal end of the inner shaft, a sheath (20) comprising a stepped end (72) and a valve (58), and a stent (40) shown in figures 1-4I of Fischell.

In regards to claim 20 Fischell discloses all of the claimed structural requirements and a method of using his catheter described in column 6 on line 14 through column 8 line 6.
